

INSTRUCTION MANUAL

Crimping tool for the application of wire end ferrules 0.14 - 6.0 mm²

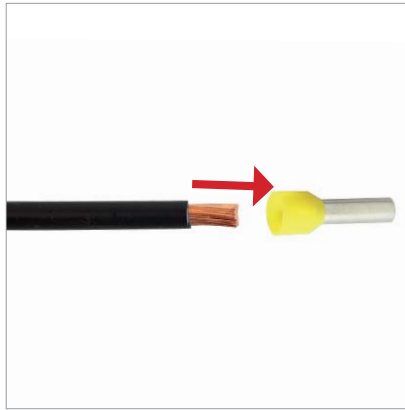

Version AE2/03/17-REV. 0

MADE IN GERMANY

Crimping

1 Close the tool until it opens automatically.

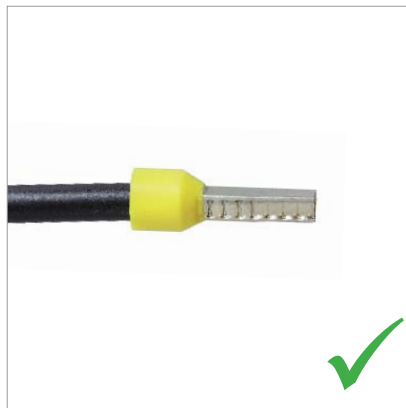

2 Strip the wire to the correct length and insert it into the terminal until stop.

3 Insert precisely stripped wire with the wire end ferrule into the profile. Close the tool until it opens automatically.

4 Remove correct crimped terminal out of the tool.

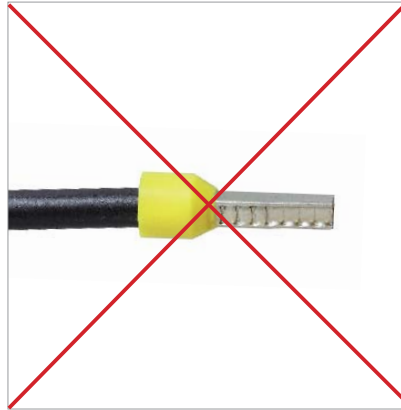

Premature Release

In case of incorrect handling, the tool can be released prematurely:

- 1** Push the release lever of the ratchet upwards. Tool opens automatically.

Do not use the crimp in case of a premature release!!!
