

TUFF-SEAL™

MULTIPLE HOLE BUSHINGS

The Tuff Seal family of Multiple Hole Bushings are ideal for use when multiple conductors need to be terminated into one fitting. Standard bushings are made from Neoprene but optional materials include silicone for high-temperature applications and Viton® for enhanced corrosion resistance.

Remke Multiple Hole Bushings can be made to fit into cord connectors made from aluminum, nickel-plated aluminum, steel and stainless steel, nylon or Valox™.

| Part # | Bushing Spec | Number of Holes | Diameter Each Hole | Hub Size |

* Custom multiple hole bushings are available. Consult factory.

ACCESSORIES

These seals and locknuts can be used with all external conduit threads, except Pg and I.S.O. metric threads.
