## forward-reverse switches

Cole Hersee manufactures several rotary switches that can be used in Forward-Reverse applications. These switches are DPDT Momentary On - Off - Momentary On, such as the 90005 series switches (15A at 12V DC). For demanding applications, there's the 75712-04, rated at 50A at 12V DC.

But we make other types of controls that can switch a motor to forward or reverse mode:

55046 Toggle Switch 25A at 12V DC

58027-18 Rocker Switch 25A at 12V DC

90005-03 Keyed Switch 15A at 12V DC

Cole Hersee switches: always lots of choices.
